

The decision by Sinclair Broadcasting to demand that the stations in their network broadcast an obvious piece of partisan propaganda in the next few weeks is a clear attempt to influence the outcome of the presidential election.

I believe that it is the responsibility of the FCC to oversee the public airways and ensure that the public interest is being served. If Sinclair continues to use their access to the broadcast spectrum to promote a special-interest agenda, then I believe it is time to regulate their activities. Please show some courage and stand up to the misuse of the public airways and the electoral process. The essence of our democracy is at stake.

Thank you.
